

Module 3 Contribution Journal

ITAI 1371 — Individual Contribution Record

Student: Derrick K. Gibbs-McGlaston

Important: Replace the bracketed sections with the specific work you actually performed for your group. Do not claim work that another team member completed.

Notebook / Coding

[Describe the cells, code, experiments, debugging, or execution you personally completed.]

Data Analysis

[Describe the dataset exploration, feature selection, visualizations, or interpretation you personally performed.]

Modeling

[Describe the models you personally trained or tested and what you learned from the results.]

Documentation

[Describe any README, comments, notes, screenshots, reports, or other documentation you personally created.]

Team Coordination

[Describe specific meetings, task assignments, GitHub work, communication, or integration work you personally completed.]

Problem Solving

[Describe one technical problem you encountered and the steps you personally took to solve it.]

Final Contribution Summary

[In your own words, explain what you personally contributed to the project and how that work helped the group complete the assignment.]
